What's New in the AllWebMenus Web JQuery Tooltips Addin?

The "Likno Web/HTML Tooltips Builder" plugin has been tested in the IE8, IE9, FF, Chrome, Opera and Safari. Enjoy the functionality of tooltips as found on many web sites like Facebook, Google, Twitter etc.. Creating cross-browser compatible tooltips using the "Likno Web/HTML Tooltips Builder" plugin is effortless.

A) Tooltip-Data (optional) - The plugin can automatically generate tooltips with data, based on the current item.

B) Tooltip HTML - If not selected, the tooltips are based on the "data-html" attribute, which is used by the plugin to generate the HTML for the tooltip.

C) CSS - If not selected, the tooltips are styled with the Addin's CSS.

D) Extra CSS - Additional CSS which can be used to override the default Likno Web/HTML Tooltips Builder styles.

The tooltip for the "data-html" attribute can be generated using several different methods.

A) CSS - The tooltip can be created using the "Likno Web/HTML Tooltips Builder" plugin's default CSS.

B) CSS "JS" - The tooltip can be created using the "Likno Web/HTML Tooltips Builder" plugin's CSS in combination with JavaScript.

C) Class Names - The tooltip can be created using the class names which the "Likno Web/HTML Tooltips Builder" plugin creates for the items.

D) Data (optional) - The tooltip can be generated using the "Likno Web/HTML Tooltips Builder" plugin's "data-attr" attribute. The plugin generates several CSS properties and an HTML element for each tooltip. For example, to generate a tooltip for a menu item that shows the image of the item, the following properties are generated:

- 1) The element that shows the image of the item. The element's class is "tooltip-img".
- 2) The element that shows the title of the item. The element's class is "tooltip-title".
- 3) The element that shows the text of the item. The element's class is "tooltip-text".
- 4) The element that shows the text of the item. The element's

class is "tooltip-text-ellipsis". 5) The element that contains the entire tooltip element. The element's class is "tooltip-container". 6) The element that contains the heading of the tooltip. The element's class is "tooltip-heading". 7) The element that contains the body of the tooltip. The element's class is "tooltip-body". The plugin can generate extra properties for the tooltip, based on the items ID and the current page. The extra properties are in the following CSS Classes: 1) "tool
